

Plex Media Server

My favorite media server application. The page inside holds my code for running this inside of a docker container. You can paste this into a docker compose yml file.

- [Docker Compose](#)

Docker Compose

Copy the code below and add to your compose file. Adjust the file paths to match your storage.

services:

plex:

image: lscr.io/linuxserver/plex:latest

container_name: Plex

network_mode: host

environment:

- PUID=1000

- PGID=1000

- VERSION=docker

devices:

- /dev/dri:/dev/dri

volumes:

- /dev/shm:/transcode

- /Config/Plex:/config

- /path-to-movies/Movies:/movies

- /path-to-series/TV:/tv

- /path-to-music/Music:/music

restart: unless-stopped
